ANNOUNCEMENT

SIXTH INTERNATIONAL CONGRESS OF RADIATION RESEARCH 13–19 MAY 1979, TOKYO, JAPAN

THE Sixth International Congress of Radiation Research will cover wide fields of physics, chemistry, biology, and medicine and their interdisciplinary areas of radiation research (including non-ionizing radiations) through five plenary sessions, thirty symposia, one workshop, and contributed paper sessions. Some of the topics include frontieers of radiation oncology, applied radiation research in agriculture and industry, risk assessments of radiation, environmental mutagens and carcinogens, radiation research in fusion powers, global radioecology, toxicology of radionuclides, etc.

Group flights at reduced rates have been planned from various parts of the world. The participation of young scientists has been encouraged. Information on satellite meetings, travel information (including tips for the budget-minded), and other information on the Congress are provided for.

The deadline for registration, abstract, etc. is 30 November 1978.

Those who have not received the package of the final circular [the second circular, the application forms, and the Japan Travel Bureau (JTB) travel information] by this time, should write, at once, to:
